

**RECYCLING
SOLUTIONS**

International Exhibition for Waste Management and Recycling

12+

January 27-30, 2026

Venue:

Organizer:

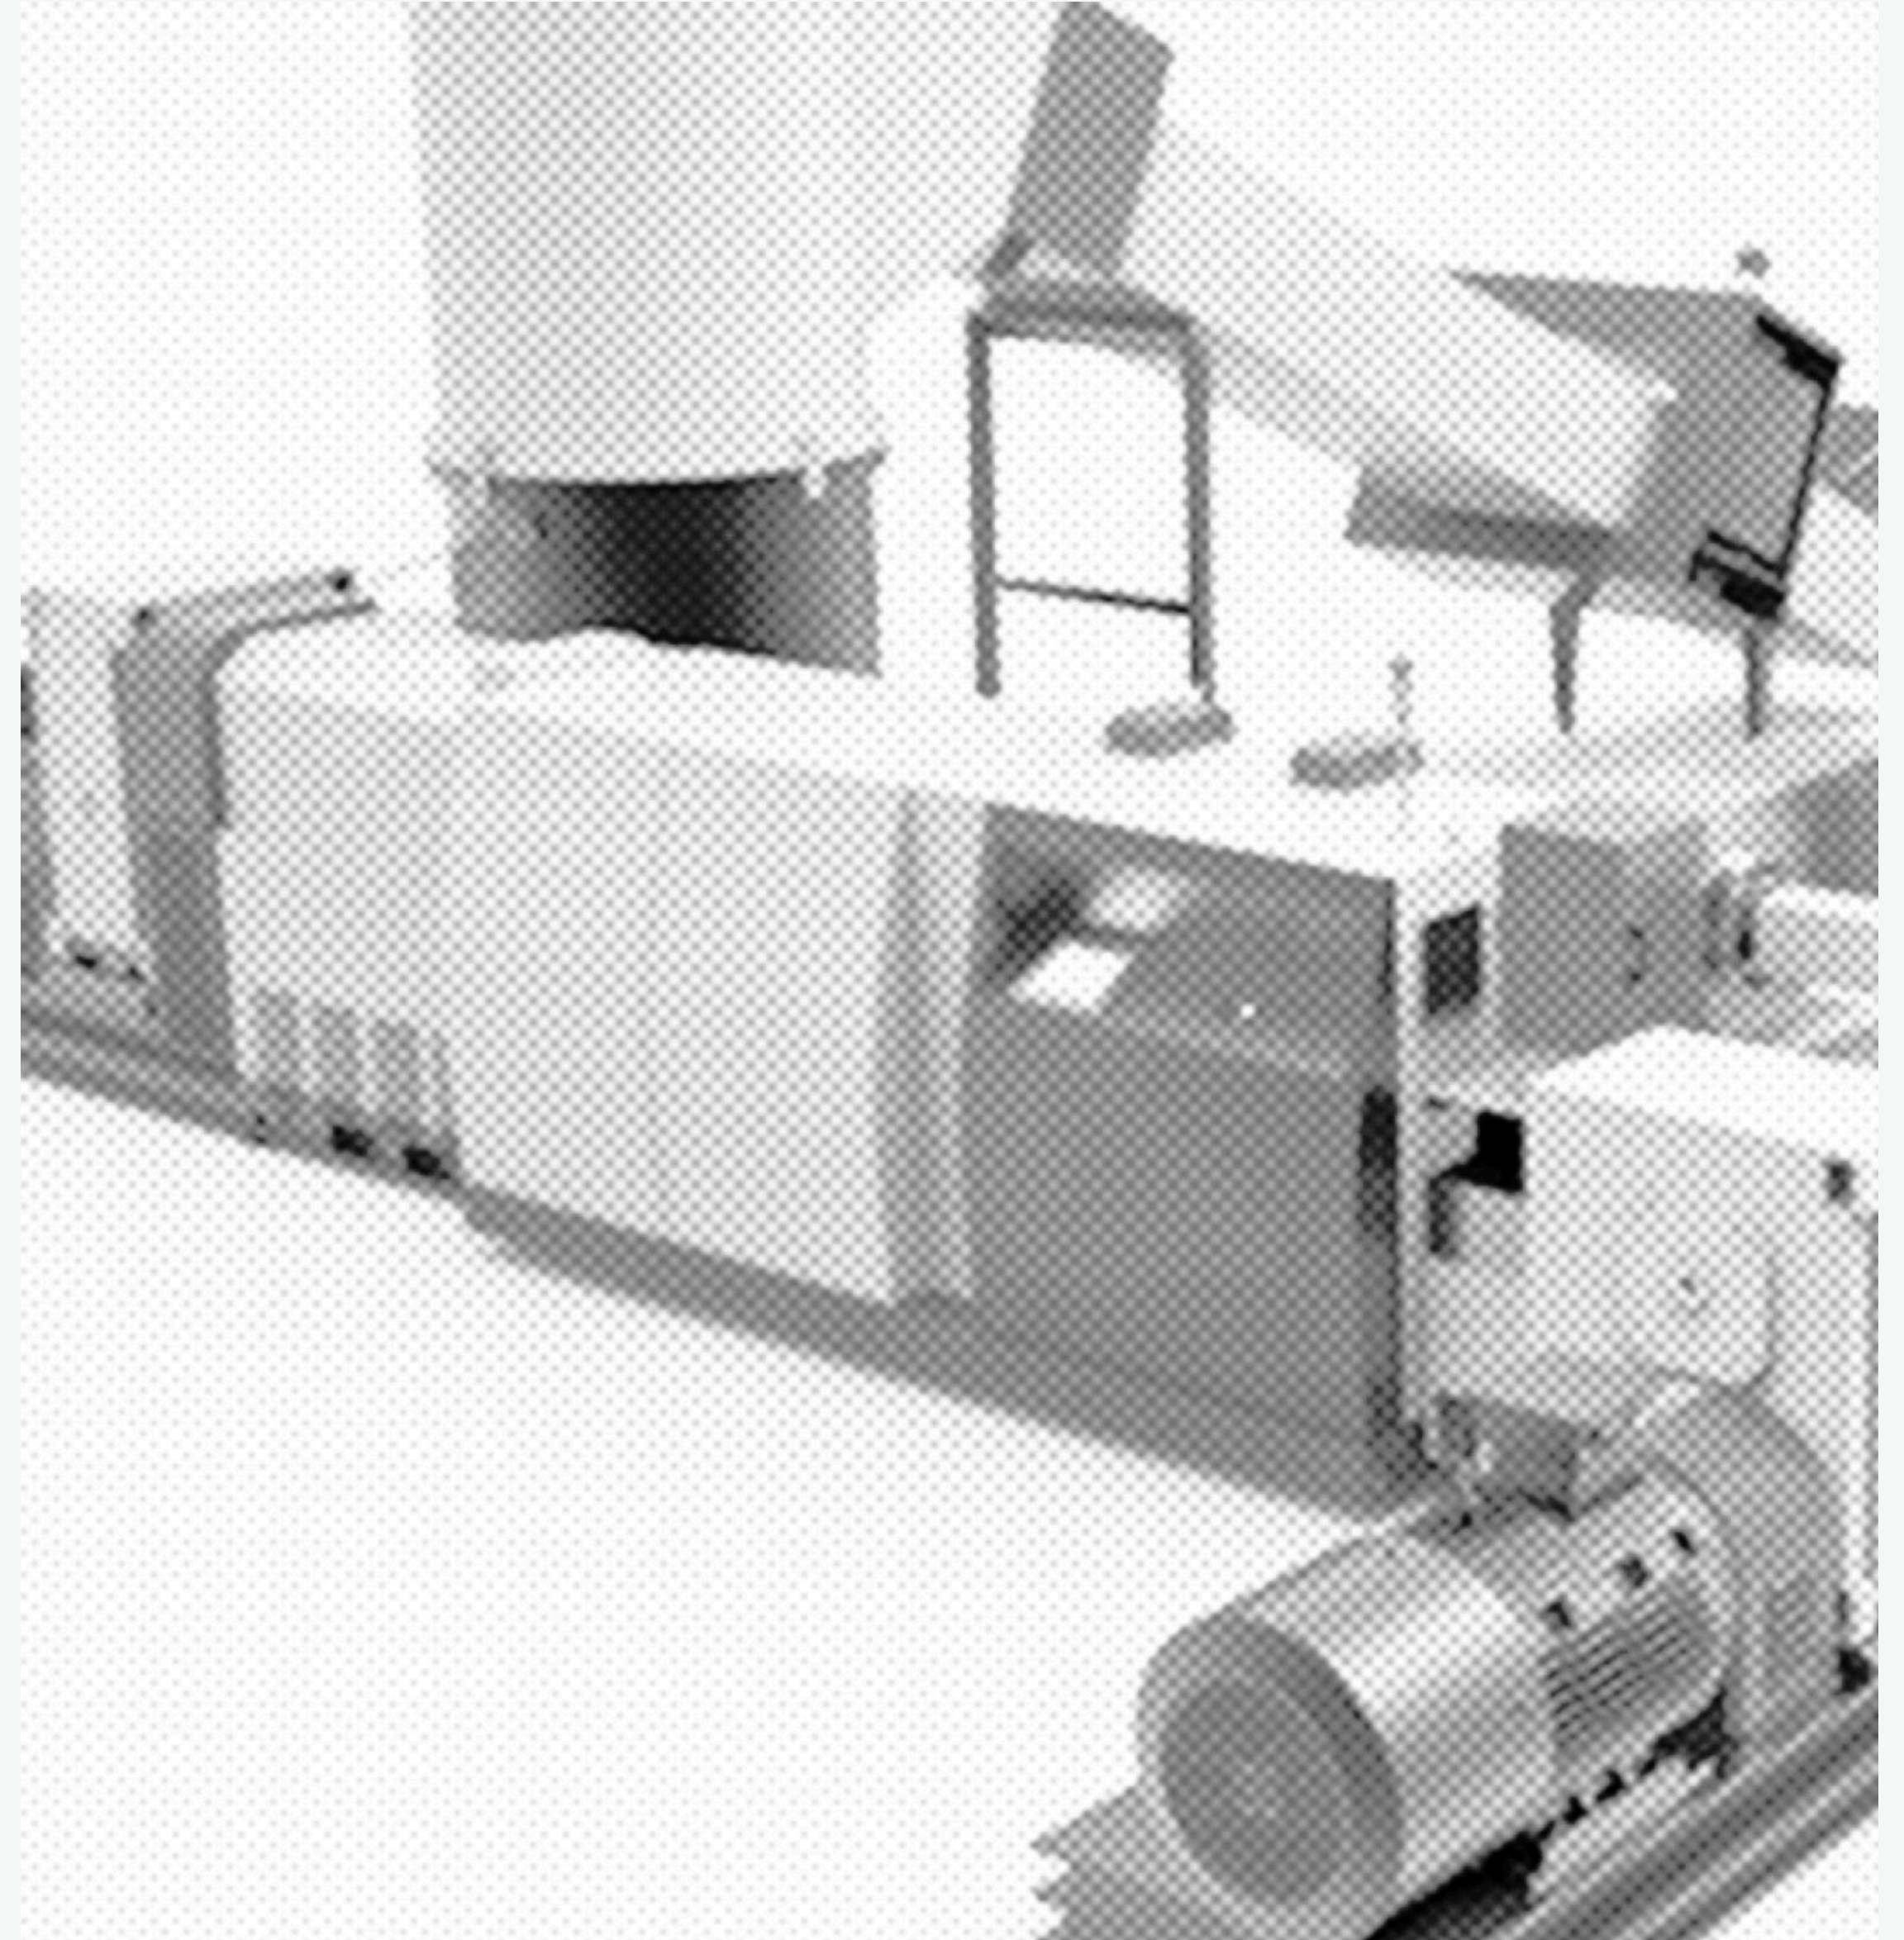

RECYCLING SOLUTIONS is a modern exhibition platform that presents the main market players, the newest technologies and trends.

Innovations in the field of sorting, processing and reuse of polymers, waste recycling and development of the circular economy.

Processing Technologies

The exhibitors offer various processing technologies – from conservative to advanced: cold and compression pressing, casting, extrusion and calendering, molding and orientation drawing, recovery.

Sorting and Recycling

Proper sorting of polymers intended for further processing is of great importance. Exhibitors offer to get acquainted with new technologies in this area at their stands and during reports at the Polymer Plaza Business Forum.

Secondary Raw Materials

Many exhibiting companies demonstrate, in addition to processing equipment, finished secondary products at their stands, which can be used both in industry and in everyday life.

Circular Economy

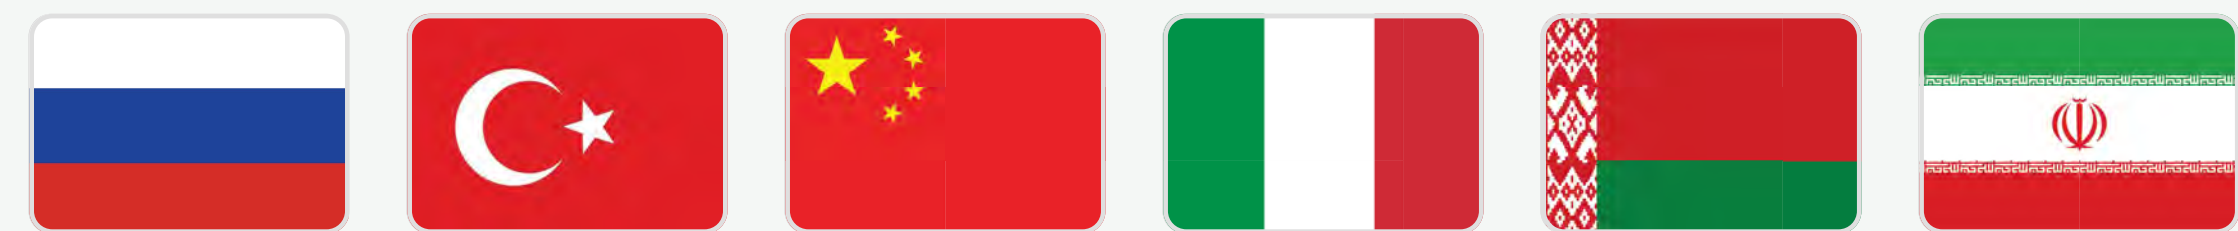

One of the objectives of the exhibition is to develop the reproduction economy, which not only serves as administrative and financial support for the implementation and development of processing technologies, but also becomes a business strategy for many market players.

Participants

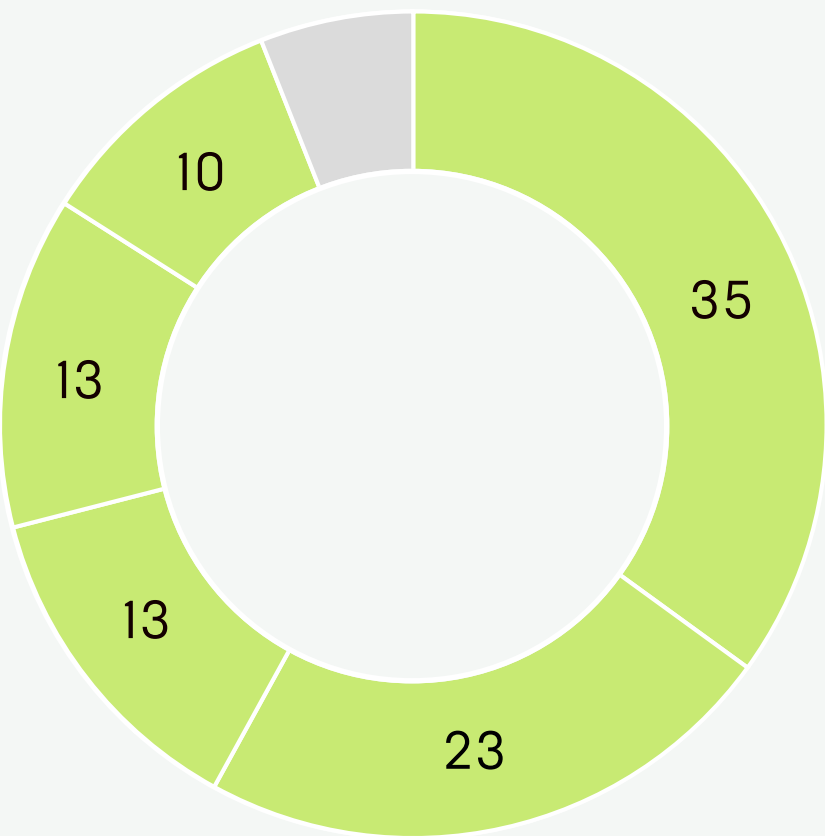

Exhibitors

1000 

20 participating countries

Companies

Production & Sales of products	35%
Production & Sales of raw materials	23%
Production & Sales of equipment	13%
Services, Consulting, Education	13%
Research & Development	10%
